

Instruction Sheet

42008 - Fido and Morris

Easy to do!

Fun to do and looks great too! Just peel, pour, rub and display! Collect all eight kits!

Helpful Hints: Always start with the darkest color sand first, then progress to the lightest. Never peel from the outside. This can fray the board. Use a pushpin or paper clip to peel off the protective paper. Tap off excess sand onto clean sheet of paper to save and use again.

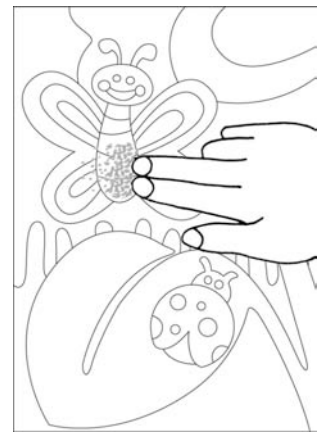

PEEL

POUR

RUB

Step-by-Step

1. Protect your work area with paper.
2. Select one of the two pre-cut art designs.
3. Follow the color key on the back of these instructions for color placement of the sand.
4. Slowly peel off the paper covering a pre-cut area. Work only one color area at a time.
5. If a piece of paper accidentally lifts away, simply push it back down into the adhesive.
6. Gently sprinkle the colored sand over the exposed adhesive.
7. Rub the sand into the adhesive with your index finger.
8. Remove excess sand by tapping the side of the picture. Save your excess sand for the next picture by tapping it onto a clean sheet of paper!

Non-toxic • Conforms to ASTM D-4236 • Made in the U.S.A.
